I want more games like this game.

When I played I was sometimes confused but I found correct way.. Yay! Just finished the game.. At first i was afraid to purchase it cuz there's no reviews and all to get a view of it. But just looking at the pictures in store made me purchase it.. And it was all worth it. The hollywood humor, the gameplay. Reminds me of the good old point and click advetures. Feels like it should cost more. I definitely recommend it to everyone. It seems quite a long game which i like too.. Decent point & click game. If you like this kind of games then you'll like this one as well.. Better to spend your time reading Bible I'd say.

#### PROS

Dabbing, really enjoyed in it's original language, Czech.

Sound effects realistic.

Easy play, puzzles are not hard, kind of intuitive.

Sci-Fi section: flying car, laser-broom.

Graphics (Except missing screen resolution options).

Funny commentary here or there.

Plot can be surprising, commercial references downplay that.

#### CONS

Hollywood references, settings, politics, etc. undisclosed God\destiny explaining game rules.

Tutorial, happening out of character.

Detective is using and taking every thing as if it all was his.

Vulgar dialogs, scenes, references, a bit violent.

Technical side, no cut scenes visible on Windows 10 build 1734.285.. Great point 'n click adventure game! Specialty for czech people who will get all the jokes and references.
